## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Robertson et al. (6,203,553). Robertson et al. disclose, in figures 3-10, an apparatus and a method with the apparatus for effecting a desired geometric change in the annulus of a heart valve and limiting mitral leaflet prolapse (by installation of a prosthetic heart valve), where the apparatus and method includes deployable first and second plication bands (84), where each band comprises first and second legs (90, 92), a deformable bridge (91) connecting the legs, and a linking construct (94) connected to the bands and extendable across the mouth of a valve (H).

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Michler et al. (6,482,224) teach a staple with a linking construct (fig. 5).
